

HOW TO GUIDE FOR CLEANING YOPLAIT® PARFAITPRO® PACKAGING

Option 1

Remove residue.

Begin by pushing out the remaining product. Use a smooth edge of a table or plastic scraper to do this.

Be sure to capture all the residue, especially in the corners.

If you find some products stuck in the top spout, cut that section off and dispose of it in the trash.

Cut, rinse and dry.

Option 2

For a more thorough clean, cut open the bag quickly.

Rinse it with water, making sure to remove all traces of residue.

Then pat the bag dry and showing no moisture is left behind.

By following these simple steps, you'll keep your bags in top condition, ready for their next use.

Connect with your waste hauler to recycle pallet wrap, bundle film, and ParfaitPro® bags.
