

## Flower Power!

Flowers provide the nectar and pollen that bees and pollinators feed on.

# Bee-Friendly Gardening: 101

Simple ideas to grow a garden bees will buzz about.

## Staggered Sprouts

Plan for overlapping bloom times to support pollinators from spring through fall.

## Recycle Your Roots

Leave them in the soil after harvest for compost.

## C'mon, Let's Compost!

Keep food scraps out of the landfill and use them to create nutrient-rich soil ready for a thriving garden.

## Nurture Nest Sites

Leave patches of bare ground and brush piles in an area free from pesticides for bees to nest.

## Grow Local

To make sure your garden grows at its best, learn which plants are ideal for your region.
