# Joplaif K-12 OPERATOR GUIDE

# 

BEFORE YOPLAIT® BECAME THE #1 K-12 YOGURT', it set out to continue one of the world's oldest, most storied food traditions. The brand first started as an alliance between six major French dairy co-ops in the '60s, each with strict standards on caring for their land and cows. Quickly, Yoplait's iconic flower logo, sophisticated European aesthetic and unmatched taste upended how people ate vogurt—in France, and around the world.

> Yoplait went on to become a U.S. sensation, and eventually made a huge impact on K-12 meals. With a variety of products, Yoplait has continued to be a leader in schools with great-tasting yogurt that fits into a nourishing, balanced diet for growing students.

We're excited to continue on our path as the go-to K-12 yogurt with exciting new products, more sustainable practices from our farmer-led co-ops and the same great taste students know and love.

# A tradition of INNOVATION

Did you know that Yoplait<sup>®</sup> was the **first to offer bagged yogurt to K-12**? For decades, we've paved the way with industry-changing products like:

ParfaitPro: Foodservice's first bag bulk yogurt. Its easy-to-pour bag takes up less fridge space and creates less waste.

Go-Gurt<sup>®</sup>: A school lunch revolution, and the fastest-selling yogurt product ever released.<sup>2</sup>

Trix™ Yogurt: Inspired by our popular cereal, Trix™ yogurt has a taste kids know and love. It continues to rank as one of the most popular options in K-12.

Yoplait® Smooth: A new, trendy 4 oz. cup yogurt made for secondary students in three delicious flavors.

In recent years, our passion for quality has extended to a number of innovative sustainability practices, including:

- Sustainably sourcing 91% of U.S. dairy, with the goal of reaching 100% by 2020<sup>3</sup>
- Advancing regenerative agriculture practices on 1 million acres of farmland by 2030<sup>4</sup>
- Partnering with three dairies (which account for ~16% of the raw milk used in North American Yoplait<sup>®</sup> products<sup>5</sup>) to pilot regenerative agriculture practices with the goal of **reducing** on-farm greenhouse gas emissions, rebuilding soil health and improving animal welfare
- Reducing the amount of plastic used in ParfaitPro<sup>®</sup> bag packaging (less than less than the main competitor bag packaging)<sup>6</sup>
